Summary

I am an experienced web developer with two year of hands-on experience in front-end development. With a strong skill set in front-end technologies such as HTML, CSS, and JavaScript, I am proficient in creating visually appealing and user-friendly websites. Additionally, I have expertise in AWS (Amazon Web Services) for cloud deployment, Java for back-end development, and Git for version control.

My proficiency in Java enables me to contribute to full-stack development projects and handle server-side programming tasks. With Git, I can efficiently manage code repositories, collaborate with other developers, and track changes throughout the development process.

Education

Bachelor of Commerce

Computer Applications - VLBJCAS
2015 - 2018 | Tamil Nadu, India

Work Experience | Amazon

Automation Specialist | Full Stack WEB Developer

Jan 2021 - Present

As a junior full stack web developer, I have been responsible for developing responsive user interfaces using HTML, CSS, and Bootstrap to create intuitive and visually appealing experiences. I have implemented interactive features using jQuery and JavaScript, improving functionality and enhancing user interactions. On the server-side, I have leveraged Java to develop efficient logic and RESTful APIs, facilitating seamless data processing and integration. Additionally, I have managed and optimized MySQL databases, ensuring efficient data management and retrieval. With Git, I have maintained code integrity and collaborated with cross-functional teams throughout the development process. These responsibilities have allowed me to contribute effectively to high-quality web application development.
